

Testing at home – the process

ⓘ It is recommended that you **test yourself in the morning** before attending your education setting (so there is less chance you get infected between taking the test and attending the setting). However, you may choose to do the testing the evening before, especially the first time, to give you more time to get accustomed to the test, and to have more time for your education setting to react to a positive test result.

ⓘ If you receive a positive LFD result you should [book a confirmatory PCR test](#). We would advise visiting a community or drive through test site as this is the quickest way to get tested, or you can order a home test kit. It is important that you self-isolate until the result of your PCR test. If you test negative, you must continue to follow national and local rule and guidelines including regular handwashing, social distancing and wearing face coverings, where required.
